

Driver & Load Management Made Simple

MANAGE YOUR LOADS THROUGH THE CLOUD WITH MYGEOTRACKING™

If you have ever-changing number of loads and drivers to manage on behalf of your Private, USPS and Government clients, you need to know where they are and how their loads are doing in order to meet your contract obligations. But this can be a real challenge when using vehicles, contract drivers and companies that can't provide you with real-time location and load status information.

The cloud-based USPS-certified *myGeoTracking* service from Abaqus solves that for you by locating and reporting *any existing* cell phone* to let you quickly and easily manage driver and load location and meet contract compliance requirements.

- Manage all Private and US Government contract “trips” from a trip management dashboard.
- Dynamically assign drivers to trips and loads and initiate autotracking programs.
- Supports Geofencing, Geocorridors and rules-based location and reporting.
- Drivers can communicate load and job status through location-tagged Interactive Voice Response (IVR) calls and SMS.

The service **DOES NOT REQUIRE** special GPS devices, smartphones or software.

“The myGeoTracking service from Abaqus not only helped us save our US Government contracts and cut our costs by tens of thousands of dollars, it’s also allowing us to expand and get additional contracts and new business.”

—Piedmont Logistics

KEY BENEFITS

- **Locate Drivers With No GPS Costs**—Use existing phones to locate drivers and loads, quickly and affordably
- **Meet Government & USPS Contract Location Needs**—Solution is USPS TLP certified, assuring location contract compliance and customer satisfaction
- **Location-Enhanced IVR & SMS**—Stay in touch with drivers and get real-time status updates via location-tagged IVR status calls and SMS dispatching and messaging
- **Improve Customer Service**—Give your customers peace of mind through on-demand and scheduled location updates, and ensure their jobs are completed efficiently

Cloud-based driver and load location that saves you money and drives customer satisfaction

Manage Your Loads Through the Clouds with myGeoTracking™

Powerful driver and trip management tools, rules, and contract compliance tools

Managers can manage loads over iPhone, Android, and RIM phones

#	Date	Time	Status	Lat	Long	Speed mph	Address
1	2011/09/16	07:00:18	Initialized	37.5311	-122.073	62	State Highway 84, Newark, CA 94560, USA
2	2011/09/16	07:02:18	Initialized	37.5311	-122.073	49	State Highway 84, Fremont, CA 94555, USA

Custom reporting helps maximize driver efficiency and safety

Map driver and load location, see route history and set geo-fences and alerts

Communicate job status with location-tagged IVR & SMS

THE CLOUD-BASED MYGEOTRACKING SOLUTION MAKES IT EASY TO MANAGE LOAD LOCATION & MEET CONTRACT NEEDS WITHOUT EXPENSIVE GPS DEVICES

The myGeoTracking "bizUSPS" fleet management solution from Abaqus leverages a powerful location platform and US carrier relations to deliver real-time location of cell phones and other mobile devices, including dedicated telematics devices. Abaqus also provides custom engineering services to integrate location and telematics data into any business process.

The location platform is USPS TLS certified and interfaces with a carrier's network to query the location of a device through the cellular network and generate a general position using either Cell ID (located within the service area of a cell tower) or a precise location using GPS inside the device (all cell phones sold in the US have GPS built in).

A fleet manager uses the intuitive web-based myGeoTracking service to create "trips" to comply with contract needs, set-up location and event rules, map their loads and drivers, communicate with drivers via location-tagged IVR and SMS (for such things as load or job status, alerts, dispatch instructions and roadside assistance), manage accounts and generate reports that help identify ways to improve efficiency.

Easy to implement. Easy to use. Contact us today to see how myGeoTracking can help your business.

LOCATE your loads and drivers when you need to

COMPLY with USPS, Government and Private contract location reporting requirements

DISPATCH & ALERT your drivers about new jobs, road conditions and key events

CUSTOMERS BENEFIT from knowing where their loads are, and so do you

REPORTING to verify pick-up and delivery

* Service not supported on pre-paid Phone accounts
